We study geometric properties of GL-spaces. We demonstrate that every finite-dimensional GL-space is polyhedral; that in dimension 2 there are only two, up to isometry, GL-spaces, namely the space whose unit sphere is a square (like  $\ell_\infty^2$  or  $\ell_1^2$ ) and the space whose unit sphere is an equilateral hexagon.

All too often young children fail to remember the names of pattern block shapes. Over the years, Kristin Garrison has found that if teachers don't give students frequent opportunities to use pattern block names and become familiar with the attributes of the shapes, when handling pattern blocks after they leave kindergarten and first grade, they...
